### Introduction

Horizons Stewardship invited churches of all sizes and denominations to complete a short survey to provide a quick snapshot of changes in giving and worship attendance for January – December 2023 compared with the same period in 2024.

Three hundred forty-nine (349) churches completed the survey, the results of which form this report. Participants were asked to share their annual ministry giving and the region of the country in which they were located, allowing readers to compare their churches' results by size and geography.

This report shares data instead of interpreting it. The findings are presented without links to causal factors, which can be further explored through resources available in Horizons' free on-demand resource library, <a href="mailto:Giving365.com">Giving365.com</a>.

Readers are encouraged to compare their 2024 church contributions and worship attendance with those of similar-sized churches in their region of the country.

\$100k – 499k	21%	16%	+5%
Under \$100k	12%	29%	-17%

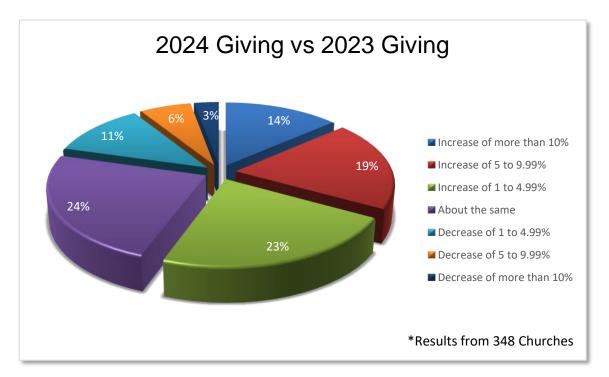

These findings highlight differences in attendance trends and giving trends among churches with varying budget sizes. While the long-term trend of declining smaller churches is a significant concern, especially among denominational churches, it is

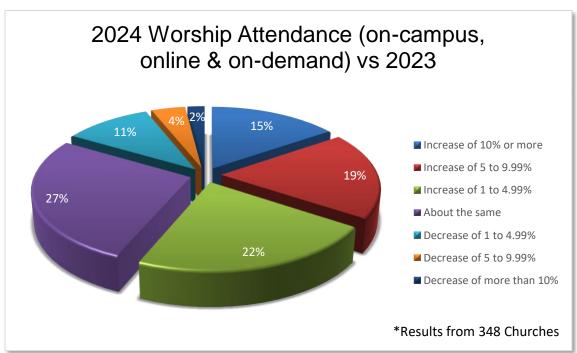

essential to remember that **churches of all sizes can and are thriving.** Horizons' anecdotal observation is that the larger the church, the more open it tends to be toward making the changes to see its ministry impact continue to be relevant in their ministry context.
